## Morning Star Child Reach Ministries News Bulletin

June 6<sup>th</sup>, 2010

**Community Outreach** Taking advantage of the good number of volunteers currently serving at Morningstar, two neighboring farming communities were targeted for evangelical outreach through medical clinics. In each of the communities there is an elementary school where we setup. All the kids get a dose of parasite medicine, get weighed & measured and seen by the Dr. Many of the parents also came along and were tended to, some basic

medicine was provided. The dentist gave a lecture on oral hygiene and checked each patient as well. Each one present had the chance to select a couple of pieces of clothing as most of the families represented are peasant farmers and just subsist off the land they live on. A program at the end of the morning included songs and the "Wordless Book" message and each was given gospel literature.

*Oh that men would praise the LORD for his goodness, and for his wonderful works to the children of men! Psalm 107:8*
